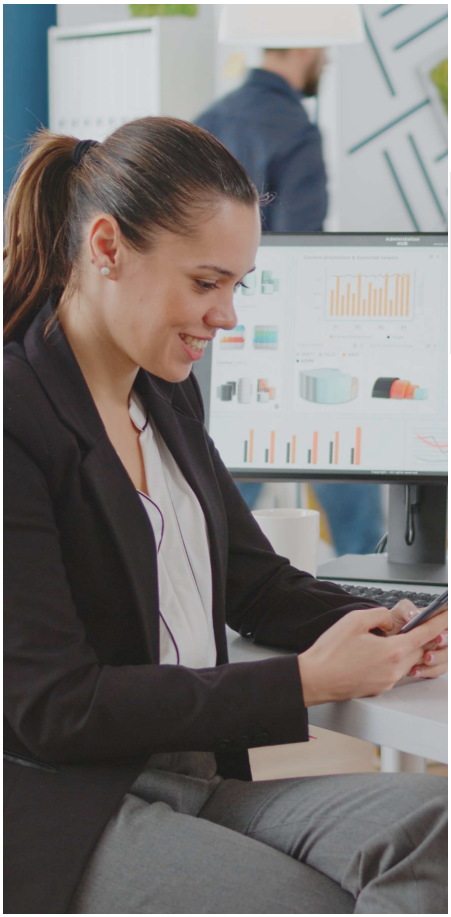
Lead the Future of Business Analytics with AI



New course:

MGMT 38900 Using AI for Business Analytics

Learn how to use **Generative AI, LLMs, coding platforms and modern analytics tools** to **solve real business problems** and **create portfolio-ready solutions.**

What you will learn:

- Frame business problems using data and AI.
- Build AI-driven solutions as functional prototypes.
- Choose the right machine learning method.
- Present clear, data-driven recommendations

Why take this course?

- ✓ Work on real-world challenges.
- ✓ Use modern AI tools (ChatGPT, Gemini, Hugging Face, Shiny).
- ✓ Strengthen your skills in R, Python, and data storytelling.
- ✓ Prepare for internships, analytics roles, competitions and certifications.

Offered in Fall 2026. No coding experience required.
Prerequisites: MGMT 305 or ECON 260.
