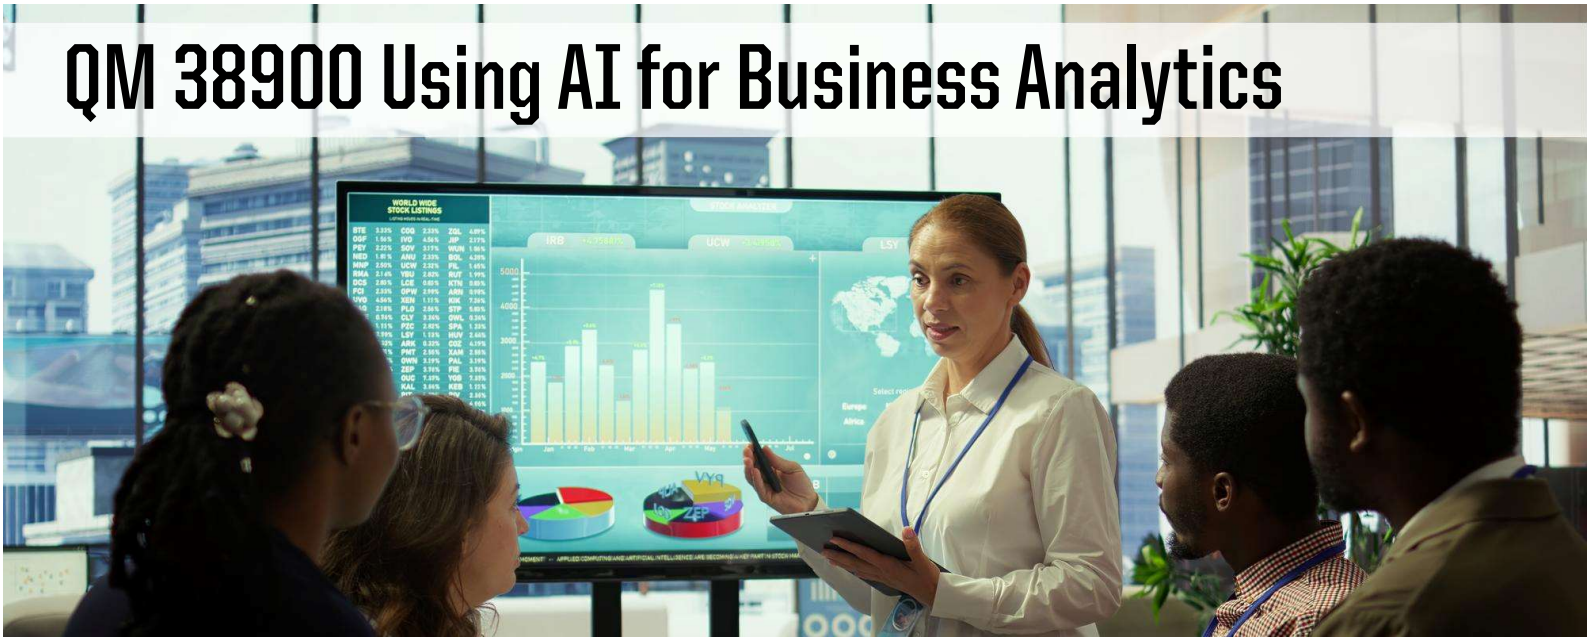
Lead the Future of Business Analytics with AI



Get ready for a **different kind of class**. You will **learn** how to **build *AI-powered analytical solutions*** to ***solve real business problems***. Discover how *GenAI, LLMs, AI Agents, coding platforms, and analytics tools* come together to ***improve decision-making*** and get a ***competitive edge for your career***.

You will learn how to:

- Frame business problems using Analytics, coding, platforms and AI.
- Build AI-based analytics solutions as functional prototypes.
- Evaluate models and select the best machine learning approach.
- Present business insights and data-driven recommendations.

Why take this course?

- Work on real-world challenges.
- Practice with industry-grade AI tools, languages (R and Python) and leading platforms (Hugging Face, shinyapps.io)
- Build portfolio-ready projects.
- Participate in national competitions and gain certifications.
- Boost your competitiveness for internships and jobs.

- ✓ **Enroll for Fall 2026! Limited seats.**
- ✓ **No coding experience required.**
- ✓ **Prerequisites: MGMT 305 or ECON 260.**
- ✓ **More info: Dr. Juan Ignacio Gonzalez: gonz1400@purdue.edu**
